One of the Most Interesting Propositions of Science.

WHAT IT ACTUALLY MEANS.

That the Sun, Planets and All Matter an Enermous Chaotic Gloud.

Everybody has heard the phrase, the nebula hypothesis, but what is it? the planets and all that is in them were at one time in the inconceivably remote past a vast mass of chaotic, incaudescent gas all jumbled together in an enormous pebula, or cloud.

To begin with the first conception that science has dared to make, however, takes us one step further back Without mentioning the origin of matter itself science conceives that in the beginning all matter was uniformly distributed throughout space - that there were no stars, no planets, no satellites, but that all space was filled with the marter we now have divided as Best, but Cornell and Columbia air paints. From this stare to the

nebrious state the theory has a misslog link, one that can only be satisfied Judging by the intense interest that by supposing divine command, for it is being displayed and the large at- assumes, in the words of Professor kethall season will be the greatest the streamon and popular indoor game has ever and. In fact, baskethall now occupies a more important place in the curriculum of college athletics than hothing better than "White Pine Cough keronous and popular ludgor game has ed in toward themselves other partientriculum of college athletics than tion upon each other the material ever before.
